ABOUT US

Alp makina, They took their first step in business life in 1986. First of all, engineering started with its activities. Our company, which aims at continuous development and growth; in 1994, our company established new and modern factory in Akşehir Industry in a 2000 m² closed area. It continues production by moving its machinery track forward every year. In the meantime, it has gained the appreciation of its customers by investing in other business lines. In 2015, as Alp Makina Lift systems: elevator cabin manufacturing started. Later: With the architectural and construction activities added to its structure, it entered the construction sector and started to be known as Alp Yapı. All of its products have TSE certificate and our company has TS-EN ISO 9001:2008. It has a quality assurance system.

MISSION

It is rapidly advancing towards becoming a world-class brand, attracting attention with its exports and impressive sales. Our company always renews itself with its mission values and provides auto control. In this context, we can address our mission as follows; Always smiling and behaving sincerely during the works and services provided, To handle the bilateral relations with the company within the framework of honesty and mutual trust. Reacting with environmentalist approaches during all kinds of work and transactions sensitive in this sense. To behave, to have environmental awareness, to take the necessary moves in this context. Ensuring that everyone from managers to employees receive the necessary training by organizing in-company trainings. To make such trainings continuous in order to take on a more functional structure. In case of sudden developing needs or when the requirements suddenly arise, they act nimbly and to meet their demands, to provide customer satisfaction with solution suggestions and to save time for customer. Practical while selling and providing technical support in the field with effective and productive moves to offer solutions...

VISION

Our company, which has been acting with the experience and knowledge gained in the sector for many years, continues to maintain its understanding of friendly and quality service. In this direction, our company The vision it has determined is based on the following values. Being a leader in the sector in terms of elevator types and related equipment set an example to another companies. To become an important brand in the world with the increase in export transactions and to represent Our country in this sense. undertake the task of promoting. Taking an active role in producer field studies and bringing innovation to the sector, take action. To meet the needs of customers in all kinds of elevators. In this sense, all needs answer, To have the competence to meet all elevator types and equipments that have become a necessity in the sector. To perform the given service as quickly as possible, never victimization based on wastage of time block. Approaching problems with solutions by acting agile and quick...
